5516 AERIAL TOOL POUCH

The 5516 Aerial Tool Pouch is the only tool pouch on the market designed for safety and organization at heights. D-rings are sewn into the bag for hassle free tool tethering, while 16 pockets allow workers to stay organized and productive.

- 1680D Ballistic Nylon
- 16 pockets for tools and fasteners
- Top cover flap with buckle closure
- Three nickel-plated D-rings for tool lanyard attachment
- Patent pending Storm Drains™
- Abrasion-resistant PVC-reinforced pouch bases
- Maximum safe working capacity: 33 lbs. (15kg)

APPLICATIONS

Utilities, Heavy Construction, Mining/Extraction, Lineman, Ironworkers, Trades, Carpentry, Contractors

BENEFITS

- ▶ **ATTACHES TO ANY FALL PROTECTION HARNESS:** Features a two strap design that easily attaches to any belt or fall protection harness. Attaches or detaches easily without needing to remove the belt or harness.
- ▶ **D-RINGS FOR TOOL LANYARD ATTACHMENT:** Three nickel-plated iron D-rings for convenient tool lanyard attachment. Keep tools tethered in the same place they are stored.
- ▶ **WEIGHT RATED:** Under normal working conditions this tool pouch is rated to a maximum working capacity of 33lbs. A warning label on the inside of the pouch explains the restrictions.
- ▶ **TOP COVER WITH BUCKLE LOCK:** Secure items in place with a heavy duty plastic buckle and adjustable strap. Top cover fits over both pockets of the pouch opening while protecting items from the harsh elements.
- ▶ **SLEEK DESIGN:** Wear the pouch as you climb! The pouch can be worn in the small spaces that surround ladders and other work environments.
- ▶ **ARSENAL® TOUGH:** This pouch is constructed from some of the toughest materials known to man. We put them all together and test rigorously to ensure that this pouch holds up in the harshest and toughest environments.
